

MIXER SILO MIX 100

Continuous mixing machine | reference : 3B03605000

High-volume continuous mixing unit for all types of powder products.

The upper and lower parts can be uncoupled for easy transport and storage of the machine. They are fitted with lifting points for transport by crane.

The upper part includes a hopper with a decompacting shaft and two vibrators for improved product descent.

The visual level and laser gauge make it easy to manage the loading of the tank. It also features an opening/closing hatch and quick-connect sockets for connection to the lower section. Its rainproof cover allows it to be stored outdoors.

The lower part includes a mixer with a simplified control panel allowing the user to manage the mixing speed and water flow, as well as the integrated high-pressure washer.

The mixer is available in 50 or 90 L/min versions. A spraying machine can be placed under the mixer. Thanks to the level sensor, the mixer stops when the tank of the spraying machine is full.

Slots at the base allow the unit to be moved using a pallet truck.

APPLICATIONS:

All types of powder products: floor screed, plaster, air insulation, fireproof products, light powders (polystyrene) ...

Products with instant kneading and no need for rest time.

TECHNICAL DATA

Tank capacity	1600 L
Electrical supply	400 V Tetra - 50 Hz - 32 A
Geared-motor driving mixing arm	5,5 kW
Variable speed	optional
Water pump	yes
Flow-meter	plastic tube with float
Water safety switch	yes
Product flow-rate	50 L/min or 90 L/min depending on model chosen
Loading height	335 cm
Loading height with upper part on the ground	175 cm
High Pressure washer	integrated
Upper part dimensions (L x w x h)	158 x 158 x 175 cm
Upper part weight	300 kg
Lower part dimensions (L x w x h)	210 x 138 x 160 cm
Lower part weight	448 kg

DELIVERED WITH

- a 10 m high-pressure hose with 600 mm double lance
