

VIBRATION RANGE

VG/VD

Engine for pendulum vibrators

The VG/VD series comprise petrol and diesel engines to drive pendulum vibrators.

+ Performance

Highly powerful and reliable motors that guarantee great vibration performance.

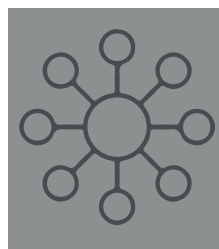

+ No plugs needed

Ideal to work at no electricity supply spaces.

+ Resistance

Robust cage for high engine protection and easy transport.

+ Wide range

Diesel or petrol engines depending on customer requirements.

- Shock-resistant steel frame
- Different couplings (universal or hexagonal) (Other types of couplings available upon request)
- Cage reinforced with dampers (depending on the model)

POSSIBILITY OF CONNECTING VOLGA PUMPS

Technical Data

MODEL	Weight (kg)	Fuel	Engine	Power (CV)	Shock absorber available
VGH 5	21	Petrol	HONDA GX 160	5.5	Yes
VGR 6	21.5	Petrol	ROBIN EX-17 DU	5.7	No
VGE 5	19	Petrol	ENAR G200	5.5	No
VLD	40	Diesel	LOMBARDINI 15LD225	6.8	Yes
VVD	35	Diesel	YANMAR L48	4.7	Yes

*Other engines available upon request.
