

## Ciocane SIMPLEX cu capete moi • Rubber composition with "Stand-Up" / Superplastic; with aluminium housing and high-quality wooden handle

3127.260

### Descrierea produsului

The SIMPLEX series 3127 is available with the insert combination of rubber composition / superplastic.

Boasting an ingenious shape, the medium hard rubber insert with "stand-up" (3202.2) allows the hammer to stand securely on its head and reduces the need to bend over, making it possible to work in a much more ergonomic and back-friendly manner. Ultra low-wear, impact cushioning and odourless, the proven rubber blend offers a much longer service life than a conventional rubber hammer.

The superplastic insert (series 3207) allows for a more powerful impact force than the rubber insert. It is a medium hard plastic insert made of extruded and extremely homogeneous material. Compared to injection moulded plastic inserts, it is therefore considerably more wear-resistant and durable.

The extra light aluminium housing with built-in handle protection sleeve allows the user to easily apply and control the right amount of impact force. This prevents fragile slabs from being damaged during installation. It also makes the soft-face mallet a very lightweight tool that is easy to carry around. The light weight is easy on tendons and joints.

Damping vibrations and shaped ergonomically, the high-quality wooden handle has a double coat of varnish in the grip area and is thus resistant to dirt.

In line with the smart SIMPLEX principle, all components are replaceable and can be retrofitted. This translates to savings in both money and resources.

This version is available in size D60mm.

D60mm and D80mm are also available with cast iron housing (art. no. 3012.260 and 3012.280).

- SIMPLEX soft-face mallet with the insert combination of rubber composition with "stand-up" (black, medium hard, impact cushioning, odourless, low-wear) / superplastic (white, medium hard, very durable).
- The extra light aluminium housing with built-in handle protection sleeve allows the user to easily apply and control the right amount of impact force (ideal of work on materials that break easily).
- High-quality, vibration-damping, and ergonomically shaped wooden handle; grip area with double coat of varnish (resistant to dirt).
- All parts can be replaced / retrofitted, resulting in great savings in cost and resources.
- Available in size D60mm.

### Domeniul de aplicații

For light/delicate workpieces, gardening and landscaping, laying slabs that break easily, floor tiling, natural stone setting

### Material

#### Mâner

- Lemn

#### Insertia 1

- Cauciuc compozit, negru
- Medium tare
- amortizare de impact
- Fără miros
- Uzură scăzută

#### Insertia 2

- Superplastic, alb
- Medium tare
- Durabilitate mare
- Rezistent la uzură

#### Carcasă

- AluminIU Al

## Reclamație

### Conform RoHS

Sunt conforme Directivei 2011/65/UE și Directivei 2015/863.

### Nu conțin materiale SVHC

Nu conține substanțe SVHC cu mai mult de 0,1% w/w - lista SVHC din 25.06.2025.

### Nu conține substanțe din Declarația 65

Nu conține substanțe din Declarația 65.
