Bucket Dolly

Healthy and safe working

The transport trolley allows you to safely lift even heavily filled mixing buckets out of the mixing machines. This eliminates the need for two people to carry them or push them on small hand trucks. This reduces strain on your back and saves energy.

Transport and emptying

Thanks to the pneumatic tires, you can quickly and easily transport your mixture to the desired location, even on uneven ground. There, you can use the bucket locking mechanism to tip out the contents precisely. All this can be done by one person. For larger construction projects, even when working with several mixing buckets, the use of the transport trolley enables rapid delivery of fresh material.

Technical details

The transport trolley is suitable for transporting Collomix 65-liter special mortar buckets (dimensions!). It can therefore be used with the Collomatic models AOX, POX and XM.

An optional upgrade kit (item no. 60318) is available for the XM3-900 Compulsory Mixer (90 liters).

Pneumatic tires, free-swinging bucket holder, bucket lock, collapsible.

Relieves back strain, maintains health

The bucket lock makes pouring the material effortless.

That's over now!

60318: Upgrade kit for 90-liter bucket

Technical data

Dimensions (when assembled):	1.250 x 690 x 990 mm
Dimensions (when collapsed):	1.250 x 690 x 310 mm
Weight:	22,8 kg
Ref.no. Bucket Dolly 65-liter:	70183
Ref.no. Conversion Kit for 90-liter bucket	60318
